

# In Search of the Hollow Earth:

## Passport to Eternity, etc

by James D. Still

Last October 25, 2006 Hsu and I visited the UFO Museum in Roswell, New Mexico. In the Research Library, they have numerous holdings (of books, magazines, materials, etc...) and I did not find the one, which is the most important of all UFO books. I told the librarian and she said, "What is it?" I located it on Google: **PASSPORT TO ETERNITY** by Laurence W. Foreman, 1970. She got it! Permit me to tell you, my brothers and sisters, how I got the book.

My friend, Rene loaned me the book, **PASSPORT TO ETERNITY** at the same time he explained that he learned from another person about Laurence W. Foreman's contacting the UFO people, he wrote the book, and then he gave the books away to anyone who wanted to read it. Rene went to his place, and then he got the book for free. He saw a cat named "Susie" which UFO people gave the author. Out of my curiosity, Jo Ann, my first wife and

I met him at his place in Los Angeles. He was a cheerful gentleman inviting us in his house. Sure enough, he wrote "Feb. 16, 1979, To Jo Anne and James Still, My very best Regards, Larry Foreman" inside the book and then he gave it to us for free. I asked him if he still has his cat, Susie. He proudly pointed to the large portrait upon the wall of his typical "Dutch" black and white cat. His cat already passed away. To me it was just a common cat. He pointed to the rug, and then he pulled the rug up to show us the other side of the rug and how the UFO people weaved. I was not at all impressed. He pointed to a decorative chandelier hanging from the ceiling light. Once again, I was not impressed. He informed us that he did not see the UFO people again after he published the book. Laurence W. Foreman got the impression that the UFO people came from a far-distance star as they did not tell him that they came from the Inner Earth. (The book mentions "... because the earth is not a solid." -- Page 93) He smilingly waved his hand goodbye as we drove away. Jo Ann asked, "What do you think?" I just shrugged my shoulders.

I put my thoughts aside of the book for some years. Subsequently I found the same book at closure bookstore for 50 cents. I bought it and it ended up as a gift to Rodney M. Cluff. He got himself excited over the book as he could not put it down. So then I re-read the book several times. I did not realize that I did meet the great man.

I checked his death record through the Security Social: Lawrence Foreman, born March 27, 1908; Died February 4, 1998 at Rancho Bernardo, San Diego County, California; and buried at San Diego, San Diego County, California; S.S. # 559-05-9019; Zip Code 92128. I am not sure if it is the same man who wrote the book, but it was the only "Lawrence Foreman" I could find in California.

Bad News! We could not find the book at the Barnes and Noble bookstore nor any other bookstore. Good News! We can read (or print) a whole 114-page book through Google. It is still free! I would encourage all Hollow Earth brothers and sisters to read the book. You be the judge and jury. Enjoy!

It is interesting to note that the author had wondered who would read his book. He was told that his book "will be read and discussed by every engineer in the world, and by all of your politicians, theologians and other people." (Page 96) I believe it will be happening soon.

## To Live Forever?

According to the *MESSAGES FROM THE HOLLOW EARTH* by Dianne Robbins, 2003 (Page 85) Mikos is over 483,000 years old and 15 feet tall. I must admit that it is far-fetched and I scratched my head on this. But in fact, there are some supportive evidences that it is possible we could live forever. Dr. Micho Kaku quoted from Dr. Elliot Croke, Stanford University biochemist into his book *VISIONS*, 1997 (Page 200, Chapter 10, To Live Forever?): “By design, the body should go on forever.” Laurence W. Foreman mentioned in his book, *PASSPORT TO ETERNITY*, page 109 that the UFO “people live, practically, forever.”

I believe that we could live “forever” if we have the advanced medical technique and the proper environments. Permit me to quote from *MY LIFE WITH THE ESKIMO* by Vilhjalmur Stefansson, 1913, pages 187-188: “At another time, in describing to them [Eskimos] the skill of our surgeons, I told them that they could put a man to sleep and while he slept take out a section of his intestines or one of his kidneys, and the man, when he woke up would not even know what had been done to him, except as he was told and as he could see the sewed-up opening through which the part had been removed. Our doctors could even transplant the organs of one man into the body of another. These things I had actually never seen done, but that they were done was a matter of common knowledge in my country. It was similar in their country [*beyond them live the Nunatagmiut*, page 281], one of my listeners told me. He himself had a friend who suffered continually from backache until a great medicine-man undertook to treat him. The next night, while the patient slept, the medicine-man removed the entire spinal column, which had become diseased, and replaced it with a complete new set of vertebrae, and—what was most wonderful—there was not a scratch on the patient’s skin or anything to show that the exchange had been made. This thing the narrator had not seen done, but the truth of it was a matter of common knowledge among his people. Another man had had his diseased heart replaced with a new and sound one. ... In spite of any arguments I could have put forth, the net result of our exchange of stories would have been just what it was, anyway—that they considered they had learned from my own lips that in point of skill our doctors are not the equals of theirs.” Keep in the mind, the famous explorer and doctor, Vilhjalmur Stefansson published his book in the year of 1913.

*PASSPORT TO ETERNITY*, 1970 mentions this in page 109: “Our reward

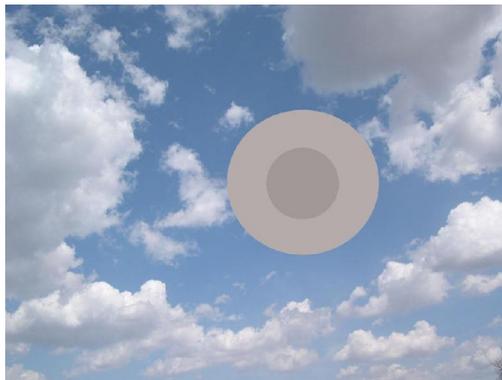

will be to be present when a blind man regains his sight, or a deformed person is made whole.”

Interestingly, *TELOS* by Dianne Robbins, 2000, pages 48-49, I quote: “Know that in Telos, we have the capability of healing all imaginable illnesses, and replacing severed limbs and organs. We work primarily with the etheric body to restore lost limbs and body parts. It’s easy to do, once you understand the Universal Laws of Creation. If your organs have been removed, or you’ve had a limb severed in an accident, they can be restored in your physical body again. They always remain in your etheric blueprint. So you never really lose anything in life. All is in safe keeping until you rise in consciousness and understand the Divine Laws of Creation.”

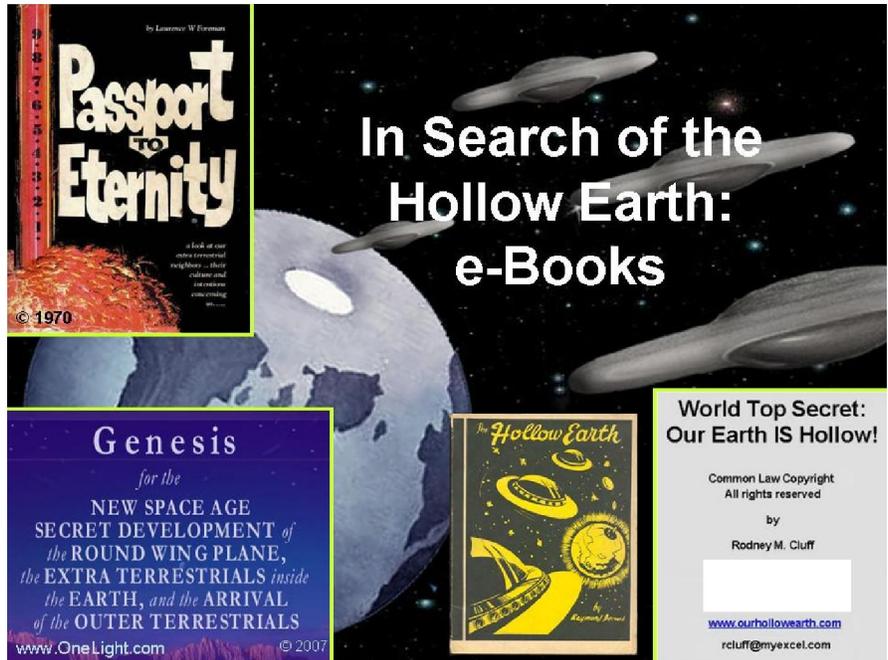

That is really good news for all of the handicapped people and war veterans.

Moreover, further reading, I would recommend that reader trying to obtain a whole text of e-book, *GENESIS FOR THE NEW SPACE AGE* by John B. Leith, 1980 (never published) through [www.OneLight.com](http://www.OneLight.com). Recently, I was fortunate to receive the copy from my friends, Rodney and Jason. I must say that the whole thing in the book is overwhelmingly impressive, but I, like Rodney, do have the mixed feeling in some points. Focusing on the longevity, read the whole 15-page chapter: **Appendix: Social, Political, Economic and Religious Life in Inner Earth** (including longevity).

If the readers asked me, “Is this reality?” I would just shrug my shoulders. I am doing this based on my research, my experiences and my sightings for forty years. One of the sightings, shown on the image below, I had seen the flying saucer at Mt. Whitney, California which was not far from Area 51 in Nevada. This occurred during the broad daylight in the summer of 1970. It was so beautiful a sighting no one could deny its existence. There, I

became the UFO hunter that led me into the Hollow Earth Theory. As time passed on, I can safely say that, "The Earth is hollow, the fact is solid; in other words, the Earth is solid, the fact is hollow."
