

Cigar-shaped Venusian mothership photographed by George Adamski

Are we alone in the universe or even our solar system?

NASA would have us believe that we are alone, that they have been unable to detect any sign of life in space or on any of the planets in our solar system. Yet since at least the 1940's contactees have testified that they have met with people from other planets in our solar system.

For example, one contactee we met at the UFO Conference here in Phoenix, Arizona in 1990 was Howard Menger. He had on display a model of a flying saucer that he built for the U.S. government from knowledge he learned from the people of the planet Venus that he had interacted with all his life. I bought his book, *The High Bridge Incident Revisited*. He relates in his book that about the age of 8 he was playing with his younger brother on their parent's farm in Virginia that had a large wooded acreage. His younger brother wanted to return home, but Howard wanted to go further out in the woods. He entered a clearing where he saw a landed flying saucer craft and a beautiful lady sitting on a large rock that addressed him in perfect English. She spoke his name and told him she was from the planet Venus, and that her people had come to Earth to help the people of Earth, and wanted to know when he grew up if he would like to help them. He agreed, and when he grew to manhood, the Venusians contacted him again. They would come in their spacecraft, and he would help them put sensors out through the countryside. He also taught them our customs and helped them get jobs here on Earth.

After helping the Venusians for many years, one day he asked them if they could take him to the Moon. They said yes, and to meet them out in the countryside at midnight at a certain place. He arrived there and found another scientist there waiting also. A Venusian spacecraft came down and landed and they boarded the craft and left for the Moon. He said he could not feel any upward acceleration when the craft left the Earth and went into space towards the Moon. In his book he shows

a photograph he took of the Moon through a porthole on the flying saucer as they approached the Moon. They landed on the other side of the Moon, the side that is never visible from Earth at an extraterrestrial base. The base had domes, towers and living and working quarters for many people. He was taken on a train ride out over the Moonscape. He said the far side of the Moon was not as flat as the side that faces the Earth, but has many mountains and hills. At one point of his train ride the train stopped to let the people see where some spacecraft had crashed-landed and a man had got out and died on the surface of the Moon. Perhaps the most important thing Howard learned at this alien base on the far side of the Moon was that he personally met there people from all the planets of our solar system.

NASA has been unable to detect people on the other planets of our solar system, so where do these people live? Logically, since the evidence indicates that all the planets, and even moons, asteroids and the Sun are hollow, then the people Howard Menger met on the alien base on the far side of the Moon must live in the hollow interiors of all the planets in our solar system.

As Olaf Jansen stated in his book, THE SMOKY GOD, that God originally did not make Earth to be inhabited primarily on its exterior, but on its interior world. So the other planets of our solar system may all have unlivable conditions on their exteriors, but their interior worlds could all be paradises where people apparently do live.

In 1959, a minister from California, Dr. Frank Stranges had come into possession of a photograph taken by a United States Airforce photographer of a man from Venus. The man from Venus' name was Valiant Thor, and was meeting with others in the backyard of Howard Menger in Virginia, U.S.A. when the photograph was taken. Dr. Stranges started attending UFO conferences and showing conference attendees the photo he had of this man from Venus. At one conference in Washington, D.C., he was approached afterwards by a woman who worked at the Pentagon. She asked him if he would like to meet the man in that photograph at the Pentagon. Dr. Stranges agreed and the next morning, the woman took him to the Pentagon where he personally met Valiant Thor. Thor spoke perfect English. He said he was from Venus. That he was head of the Council of the Twelve of the planet Venus, and commander of a spacecraft 7 miles long and 3 miles tall, but had come in his small flying saucer to Earth to try to bring us back to Christ. He had landed his flying saucer near the Pentagon, and flagged down a couple of policemen and asked them to take him to their President.

Valiant Thor met with President Eisenhower and Vice President Nixon in the Oval Office of the White House. There, Thor gave the President a book with instructions on how the people of Venus could help the people of Earth eliminate all poverty, sickness and even death. He told Dr. Stranges that after a year waiting for the President's reply, President Eisenhower met with him again and returned the book, saying his advisors counselled him that we, the people of Earth, could not accept his offer because it would destroy our economy.

Valiant Thor at the time he met Dr. Stranges at the Pentagon was dressed in clothing from Earth. He showed him his spacesuit and the report the Pentagon ran on it showing it was indestructible. They had tried unsuccessfully to drill through it, to burn a hole through it and to cut it. But they could not. Dr. Stranges could not see any zipper or buttons, how it could be opened so it could be put on. He said Thor just ran his fingers down the front of the garment, and it opened, so he could get in it. It weighted only a few ounces.

Days later after his meeting with Valiant Thor at the Pentagon, Dr. Stranges received a message from Thor to meet him in the desert close to Las Vegas, Nevada. As he was driving to that area, a black car came up beside him on the highway and told him to pull over. Out got three men-in-black and came to his car to harrass him. Suddenly, Valiant Thor showed up and motioned with his hand at the three Men-in-Black and they disappeared. Thor then reached into the trunk of Stranges car without opening it and retrieved Stranges briefcase and told him, "Let's go to my ship." They went a ways out in the desert to where Thor's flying saucer was cloaked and they entered it.

Dr. Stranges became close friends with this man from Venus. He gives a nice drawing of the layout of Thor's flying saucer. It had several decks. He asked Thor if he could use his restroom. Stranges said that the toilet had no toilet paper. It crystallized the remaining waste after using the toilet, then washed it off, then perfumed him. Thor later asked him how he liked their toilet! Of course, Dr. Stranges said it was just amazing!

Dr. Stranges noticed a certain instrument on board Thor's Flying Saucer. It was similar to what ancient prophets called a Urim and Thummim, an instrument given them by God they could use to see anything anywhere anytime. For example, Abraham was given a Urim and Thummim by God and he used to it study God's star-planet in the center of our Milky-way Galaxy. He saw there were two stars of tremendous size that each took 1,000 earth years to rotate once orbiting about the same center of gravity in the center of the galaxy. One of them was God's planet called Kolob, the other was called Oliblish. Abraham was told by God through the Urim and Thummim that these stars are the governing ones, that govern "all those which belong to the same order as that upon which thou standest." (Abraham 3:3)

Valiant Thor asked Dr. Stranges what he would like to study with the instrument similar to the Urim and Thummim aboard his flying saucer. Stranges said he would like to learn more about the Dead Sea Scrolls, since not everything had been published that was found on the scrolls. Stranges later testified that he found on the Dead Sea Scrolls, evidence that spacecraft had intervened on behalf of the House of Israel on several occasions. One occasion was when the Israelites were escaping Egyptian slavery on their way to the Red Sea. The Cloud by day and the Pillar of Fire by night that guided them spoken of in Exodus was actually a flying saucer craft.

In our day, flying saucers have been noticed to hide in clouds. One person I knew in our Sun City Ward of our church was a retired radio commentator. He told me his

experience once when he was on a lake in an outboard motor boat. He was traveling towards shore and noticed a cloud ahead over the shoreline. In that same moment that he was looking, a flying saucer shot out of the cloud to about a mile away, hovered momentarily, then returned back into the cloud. He saw this in broad daylight.

Another person from Los Angeles that met with people that came from Venus in their flying saucers was George Adamski. He wrote several books on his contacts with people from Venus, and was even taken aboard their spacecraft. He had a good telescope and took some very good photos of their spacecraft, their flying saucers and motherships.

These contactees testified that they met with and interacted with people from Venus. Contactee Howard Menger was taken by a flying saucer from Venus to an extraterrestrial base on the far side of the Moon where he met people from all the planets in our Solar System. It appears that there exists a United Federation of Planets of our Solar System, but we people of Earth are the only ones that do not belong to it.
