

An illustration of the giant people of Our Hollow Earth that retrieved Olaf and Jens Jansen from the waters of the Hidekkel River shortly after their arrival in Our Hollow Earth

Have you ever imagined what it would be like traveling to another world?

NASA says it has not discovered any life on any planet or moon of our solar system. Perhaps it is because they are not looking in the right place. If all the planets, moons, and even the Sun are hollow as evidence indicates, they could all harbor life in their interior worlds. On the home page of my website, *World Top Secret: Our Earth Is Hollow!: Welcome (ourhollowearth.com)*, I give a list of about 14 people or groups of people that have been to the hollow earth, and returned to tell us what it is like. It is a veritable paradise, where people live to extremely old ages in perfect health with no sickness or disease and in perfect peace with no wars or conflicts such as those that plague our outer world.

A Norwegian, Olaf Jansen, and his father Jens accidentally discovered and traveled through the North Polar Opening to the Inner Continent in 1829 and stayed two and half years before returning through the South Polar Opening. His father was killed in the Antarctic when an iceberg fell on their fishing boat, but Olaf was thrown on top of the iceberg and survived. He was picked up by a Scottish whaling boat and

returned to his home in Stockholm, Sweden. Later he immigrated to America and had his story published in 1908 in Los Angeles by a writer friend, George Willis Emerson.

In his book, which you can read on my website, at World Top Secret: Our Earth Is Hollow! (ourhollowearth.com) Olaf Jansen tells of meeting the inhabitants of the Hollow Earth and living among them for about two and half years from September 1829 to about June 1832. He described them as very tall, the women are from about 9 to 11 feet tall, and the men from about 10 to 15 feet tall. Otherwise they were similar to north European type people, very well educated and highly advanced in the sciences and arts. They live in small cities of the Inner Continent with anti-gravity driven mono rail trains that run between them.

Upon arriving in their land through the North Polar Opening, Olaf and his father were picked up on the River Hiddekel by a Pleasure Ship of the Hollow Earth and taken to their home port city of Jehu and assigned a couple to teach them their language of Sanskrit. A year later, they were taken overland in their mono-rail train to their capital City of Eden, built around the original Garden of Eden, where God placed our first parents Adam and Eve. There they were given an interview with their King, who also is the Great High Priest over all their land. Their King invited them to stay in their land, but Olaf's father wanted them to return to Stockholm, Sweden where his wife would be waiting them and worrying about their long voyage.

The Hollow Earth people told Olaf Jansen that their God's name is Jehovah, who is the God of the ancient Israelites, which makes me believe that they are the Lost Ten Tribes of Israel, who after escaping their Assyrian captivity in about 687 B.C., traveled north from Palestine over the Caucasian Mountains and settled north of the Black Sea. My guess is that in about 450 B.C., a large group of the lost Ten Tribes of Israel migrated to Our Hollow Earth. They were cousins of Olaf and Jens Jansen's ancestors, and were called "The Chosen Ones" by the Norwegians because they were chosen to migrate into the North Countries to live in that land of Paradise.

Olaf and his father were not Christians or Jews, but worshipers of their ancestors, Odin and Thor, who they believe migrated into a paradise in the north called the North Countries, but which they discovered is the inner surface of our planet. They discovered the North Polar Opening while fishing north of the Franz Josef Land islands, and also discovered that our Earth is Hollow and contains the lost Garden of Eden, where their capital city is situated. My estimate is that their capital city is located 800 miles beneath Independence, Jackson County, Missouri, on the Inner Surface of Our Hollow Earth.
